

Bowman Cattle Complete Cow Dispersal Dec 18th Torrington Livestock Market.

First, we'd like to say there is not one big reason for dispersing this entire herd, but many small ones that brought us to this decision. This herd was started in my early twenties with the simple vision of raising our own bulls for our commercial cow herd. Throughout the years it became apparent we had slowly progressed into a registered herd. That being said I have always considered myself a commercial cowman. I believe the main success of our operation can be attributed to being mentored by many wise commercial ranchers. This has been a very hard and emotional decision for us to come to, but in the end, we agreed that it is the best decision for us and our future.

Over the years lack of labor has helped us to realize the value of problem free cows. Our focus has been on feet, good udders and cattle that hold their flesh on a practical ranch ration. This is a cow herd that has been bred on phenotype more than number type.

The victory of our program was achieved by listening to our customers and working hard to develop sound functional cattle, adequate weaning weights, and longevity in a female. We truly believe this cow herd will thrive in many different settings, whether it be a registered or commercial program.

Tomorrow we will return to our roots and focus on a slower pace with a small commercial herd.

Thank you,

Lyle & Tina
